

Boston Healthcare works with pharmaceutical, biotechnology, medical device, diagnostic, and health information technology companies to develop new and creative approaches to business and product planning. We provide clients with the information and analysis they need to be better able to respond to the dynamic nature of the health care market.

Boston Healthcare is currently seeking a health care consulting Reimbursement Manager. This position requires an individual with a proven record of academic excellence and a strong background in health care consulting and management. A public health and/or health policy background, and/or work experience in the health care arena is required.

This position requires the successful individual have a sophisticated understanding of the pharmaceutical and biotechnology industry, health care consulting, product or company reimbursement, and health policy planning.

Position Overview:

- Conduct research and analysis regarding market opportunities for new health care technologies including pharmaceuticals, biotechnologies, biologicals, genomic platforms, medical devices, and diagnostics with a focus on reimbursement
- Analyze current medical practices, competitive technologies, reimbursement policies, and other market adoption factors
- Produce written reports and client ready presentations

Requirements:

- Experience and ability to manage and supervise individuals
- Excellent writing skills including the ability to distill large amounts of information into usable reports and executive oriented summary documents
- Understanding and interest in the U.S. health care environment including a working knowledge/awareness of public and private payers (Medicare, Medicaid, HMOs, etc.), and current trends and challenges in the pharmaceutical, biotechnology, medical device and diagnostic industries
- Experience at CMS or with direct health care coverage policy, and analysis and coding experience preferred
- Ability to know and mentor other team members on rules and policies
- Ability to adapt easily to new cultures and to be a successful team player and leader
- A background in science and/or health care and reimbursement would be a distinct advantage, which may include work experience in the health care environment
- Strong analytical skills
- Excellent interpersonal and communication skills
- Graduate degree in a related field (health policy, public health, health care) required
